Annotation key: values for the FINTRAC LCTR API payload (draft)

Source: YYZ-1057026-YYZ-1-20260508-162429.pdf

- Used in the payload (extracted or derived)
- Needs a compliance decision, or flagged
- Missing: not on this document
- Linking or reconciliation only, not sent

1. **Shipment ID**
   reportDetails.reportingEntityReportReference; transaction reference (shipment ID + -T1)

2. **Consignor (header)**
   Conductor candidate. Always Travelex on the DO even when another party hands over the cash. Compliance decides: consignor or shipper.

3. **Shipper block**
   Conductor candidate: definitions[] entity name + address and startingActions[].conductors[] if the shipper is the conductor.

4. **Consignee block**
   Beneficiary: completingActions[].beneficiaries[] and definitions[] (entity name + address).

5. **Pickup window**
   transactions[].largeCashTransactionDetails.dateTimeOfTransaction. Scheduled window only; the actual receipt time is not on the document.

6. **Goods value / Total CAD**
   completingActions[].details.valueInCanadianDollars (equals the sum of the cash legs).

7. **Custody signature block (blank)**
   Empty on every delivery order: no actual receipt time, so dateTimeOfTransaction and the 24-hour window cannot be filled from here.

8. **Reference (deal numbers)**
   Link between the delivery order and its trade ticket(s). Not sent to FINTRAC.

9. **Bags, weight, seals**
   Not part of the LCTR payload. Used only for reconciliation.

10. **Customer + SDI address**
    Legal entity name and address for definitions[] (differs from the short DO names on 3 parties).

11. **CCY column**
    startingActions[].details.currencyCode (one starting action per currency).

12. **Amount column**
    startingActions[].details.amount (foreign amount, summed per currency).

13. **Travelex BUY / SELL**
    Direction of the cash: BUY = cash comes in from the customer, SELL = cash goes out to the customer. Helps identify who handed cash to Loomis.

14. **External remarks (person name)**
    Role of this person is not stated. Not used as conductor or customer.

15. **Local equivalent differs from total**
    Data-quality flag: 149,029.41 vs total 149,055.00. Total used.

Draft mapping for demo only. Field names from FINTRAC's LCTR bulk sample JSON and API validation rules (partially reviewed).
Hover over a highlight in a desktop PDF viewer to see its note. Tag numbers match this key.
